TECHNOLOGIES AND INFORMATION SYSTEMS

I am currently studying a degree in information technologies and systems. Highly proactive person with an innate passion for tackling challenges and finding effective solutions. I consider myself a person with leadership skills, self-taught, responsible, with a high learning ability, and
good at working under pressure

LANGUAGES: Spanish(Native) - English(B1)

SKILLS

JavaScript	HTML	Flask	Docker
React js	CSS	Mongodb	Git
Node js	Python	MySQL	Github

PROJECTS

STDY MATHS: Web app to practice mathematics focused on university and high school students.
React - Nodejs - MongoDB

IOT Data Simulator: web application that simulates obtaining the energy consumption data of a house and graphs it. React - Nodejs - MongoDB

Blockchain Mining: App to simulate blocks mining on a blockchain with a given target. Python - Flask

Expense List: Web application that allows registered users to keep a history of all their monthly expenses. React - Firebase

Automatic text generator: App that obtains real information (using web scraping) from internet about gender inequality and generate texts automatically with the data. Python - Flask

EDUCATION & COMPLEMENTARY

Universidad Autónoma Metropolitana
Majors: Technologies and information systems
November 2021 - Present

STDY
University community created for technological development purposes

Hackathon Coding4Integrity ONUDC 2023
Finalist

MegaHackathon gearFoundation 2023

SPACE APPS NASA 2023
